

Charging solutions for trucks

Be ready to power all your needs

Powerful solutions designed for trucks

Designed to be trusted

Complete solutions for optimal performance

As the demand for power in trucks is growing, the need for efficient battery charging is self-evident. Proper battery maintenance allows the driver to enjoy the comfort and convenience of being able to watch TV, charge their phone or use the coffee maker, without worrying that the batteries will become drained. An onboard charger is even more essential in trucks with tail lifts, as these require a lot of power.

DEFA offers a complete range of high-quality products, and a modular system with our unique PlugIn connectors makes it easy to customize, maintain and upgrade your solution. The compact size of the products and the compatible PlugIn system makes the installation easy and flexible in all types of vehicles.

A leading provider

We are a leading provider charging and power supply systems and have 30 years of experience in the heavy-duty segment. Our experts are dedicated to providing the best possible service and support to our customers.

The DEFA PlugIn system - for a joyful ride

The solution

Flexible reliability

The unique PlugIn connectors makes it easy to customize, maintain and upgrade your solution.

With a fully charged battery and the inverter supplying 230V in the truck, the driver will enjoy the ride and have access to useful facilities.

Products in the DEFA solution:

DEFA MultiCharger and Inverter - Compact, compatible and easy to install

OPTIMAL CHARGING
Temperature compensated charging

QUIET
No need for fan

IP67
For tough conditions

MULTI-PORT
Remote LED

EASY INSTALLATION
Integrates into a DEFA PlugIn system

NEW! DEFA MultiCharger 40A 24V

MultiChargers are reliable, durable and highly efficient. A compact design and our unique PlugIn system makes them easy to install and connect in cramped spaces.

1 x 35A

2 x 35A

40A 24V

EASY TO INSTALL
20% reduced size and compatible with DEFA PlugIn

CAN BE INSTALLED INACCESSIBLE
Remote ON/OFF switch available

ALLOWS ONE SOCKET TO HAVE BOTH
MAINS AND INVERTER POWER
Integrated transfer switch

DEFA Inverters

DEFA inverters provide reliable 230VAC power for all types of vehicles. They are silent, easy to install and have an ECO mode that reduces drain from the battery when the inverter is not in use.

Transfer switch

Integrated transfer switch* automatically ensures that 230V power is supplied from a connected mains outlet when possible. This prevents the inverter from drawing power from the battery and allows it to recharge. When mains power is disconnected power supply is switched back to the inverter. An additional security feature ensures that there is no power in the inlet when only the inverter is in use.

*On some models the transfer switch is an external device.

Wall outlets

DEFA has many types of sockets that makes it easy to integrate in the vehicle.

MiniPlug Cable system

Our MiniPlug system makes it easy to install and connect the various components in the system.

Remote Panel

Makes it easier to monitor battery status and makes installation of the charger more flexible.
